

Did you know you could access your retirement account information online using member self-service? Kentucky Retirement Systems is providing hands-on training in November and December to walk you through our new website and answer any questions you may have.

[Click here to register and reserve your seat today!](#)

Some of the features of self-service include:

- Use current account information to calculate a retirement estimate.
- Estimate the cost to purchase eligible service and see an estimate of monthly payments under an installment plan.
- Change your contact information such as your mailing address, phone numbers and email address.
- View your service credit, contributions, and beneficiary information.

During the workshop, you will have to register to access your account. You will need your Personal Identification Number (PIN) to register. Your PIN is printed on your Annual Statement. If you do not know your PIN, please contact the Kentucky Retirement Systems at 1-800-928-4646 or 502-696-8800 to request a new PIN.

Please contact Regina Ramirez at [regina.ramirez@kyret.ky.gov](mailto:regina.ramirez@kyret.ky.gov) or 502-696-8768 with any questions.
