

“The Employee Educational Assistance Program has benefited me in many ways. It has given me a chance to enrich my education and enhance my knowledge in achieving my goals in the workforce. This program provided me the financial assistance so I may continue my education, where I could not afford doing this on my own. I feel honored that the State supported those who wish to enrich their education. I am an undergraduate going for my associate degree in Criminal Justice and a minor in social behavior. This program is one that the State should I hope will consider keeping. Thank you for letting me have the privilege in taking part of this program.”
