* The ACA addresses coverage for evidence-based items or services with a rating of "A" or "B" in the current recommendations of the United States Preventive Services Task Force (USPSTF), as well as coverage for preventive care and screenings as provided for in comprehensive guidelines supported by the Health Resources and Services Administration (HRSA). If a recommendation or guideline for preventive services does not specify the frequency, method, treatment, or setting for the provision of a recommended preventive service, the plan may use reasonable medical management techniques to determine any such coverage limitations.
